

Objectives

LUCY CARES .. we care for you, we care for people LUCY believes that Children have rights as human beings and also need special care and protection. Every child has the right to have education, hygiene and proper medical assistance. Statistics shows that children formed about 34% of total population. It also shows that every 10 minutes a child drops out of school due to lack of fund. We have some commitments towards ensuring the basic rights of children. The first seven years in a child's life are crucial. It is in these years that the physical, cognitive, language and social development of the child is at its peak. Together with the support of Project Smile (Sponsor a Child) we can ensure them a future.

- Hygiene kit is provided to the sponsored child.
- A medical insurance is provided for the sponsored child.
- Giving support to the formal education of the sponsored child.
- Routine medical check ups helps us to find out children with signs of malnutrition.

There is no other fluid, which can totally substitute blood in the human body. Most of us do not realize that there is a constant necessity of blood and hence there is a need for motivation to donate blood voluntarily. One of our objectives is to ensure the easily accessible, adequate supplies of safe and quality blood and blood components for all irrespective of economic or social status. Blood should be pure and free from contamination. In case of transfusion of infected blood, it is almost sure that such blood would carry transmissible diseases like hepatitis, syphilis, malaria, and HIV/AIDS. HIV is one of the latest additions to the long list of already existing diseases that can be transmitted through transfusion. This objective guides us into the following operations for which necessary steps were initiated in right earnest.

- To ensure the ready availability of the required group of blood whenever it is needed (24 hours in a day and 365 days in a year).
- Organize blood donation camps among the different sectors of people to spread the messages about Blood Donation and to remove the myths and misconceptions about blood donation.
- Maintain the database of blood donors.
- Organizing Blood Donation camps among Colleges to spread the awareness among our next young generation.
- To arrange a mass public HIV-AIDS awareness campaign.
- Organize free medical camps for the underprivileged .
- Organize seminars, workshops to enhance psychological support.
